CAREER OBJECTIVE

I am a freelance web developer with a bachelor's degree in mathematics and seven years of managerial experience in the hospitality sector. I am seeking a development position in a collaborative environment that values creativity, diligence, and productivity.

PROJECTS

Simpl. — github.com/neilmbarry/SimplApp
Full Stack (MERN) e-commerce platform for wardrobe sharing. Users can query, filter and sort the online database of products. Authenticated users can also add favourites, add reviews for hosts and products as well as submit their own items of clothing to the database.

Ship-Head — github.com/neilmbarry/shiphead
A live card game utilizing React on the front end, and an Express server in combination with socket.io on the back end. Users can play games against up to three other players on separate devices, or against computer opponents.

Cheat/Sheet — github.com/neilmbarry/cheatsheet-app
Full stack (MERN) application that allows authenticated users to create cocktail information cards, and add them to a database. Users can query said database for cocktails and add reviews, ratings and favourites.

EXPERIENCE

Web Developer, Freelance — Sept. 2022-Present
- Designed and developed responsive, maintainable websites for small business in the Toronto area, with cross-browser compatibility on multiple device types.
- Secured hosting, domain, SSL certificates and integrated Shopify and Google analytics to increase conversions, track usage and monitor website traffic.

Operations Manager, Project Gigglewater, Toronto — Jul. 2020-Aug. 2022
- Responsible for adapting business model from dine-in service to virtual experiences, preassembled cocktail kits and RTD (ready-to-drink) offerings.
- Redeveloped website to showcase new offerings, to place orders and book experiences, managed social accounts to promote new product line.
- Coordinated with brand ambassadors and liquor representatives to organize and execute group virtual experiences.

Bar Manager, The Cloak Bar, Toronto — Aug. 2018-Jul. 2020
- Managed all areas of the bar, including hiring, training staff, menu design, budget and scheduling.
- Redeveloped inventory tracking and ordering system increasing efficiency and accuracy, allowing to anticipate usage, predict spending and maintain budget.
